Our Vision of Sustainability.

We want to have
the maximum
impact on people
and minimum
on the planet

We seek a **more valuable, meaningful** and more comprehensive benefit.

Enriched and balanced **with the positive impact of everything we do. Good for** people's lives, the development of their communities **and the planet we live on.**

A growth that harmonizes **the benefits of today with those of the future.**

A growth that is responsible for the consequences of our activity.

A benefit to keep growing, but in an ever better world.

Our Sustainability Strategy is guided by ESG criteria

Criteria that makes us a more sustainable company through our social, environmental and good governance commitment.

E

Environmental

Ensuring that our operations are competitive now and in the future, with decarbonization at the core.

S

Social

...maximizing our contribution to development and society...

G

Governance

...through ethical, transparent and responsible management.

→ Cosentino Inspira Lab: R&D&i Department

Efficiency

Consolidating an energy-efficient product, with an optimal use of raw materials and other resources.

Circular Economy

Increasing our consumption of recycled materials and encouraging the reduction of waste and its recovery.

Employees

Creating ever safer workplaces and thinking about the needs of our employees.

Community

Promoting initiatives that contribute to the development of all communities where we operate.

ESG Integration

Ensuring that ESG aspects are understood and shared by our employees and our partners.

Transparency

Sharing our progress through participation in rankings and benchmark indexes and monitors.

Automated Logistics Warehouse

2022	Cantoria, Spain	USA and Canada	Brazil
Investment in environmental and health and safety assets	€37 million	392,7 K\$	-
Expenditure on environmental control and improvement	€13 million	1,85M\$	908K R\$
Investment in R&D&I	€27 million	-	-

We create products that have a positive impact on the world around us. More sustainable and carbon neutral, with higher percentages of recycled materials and a longer life cycle. We use renewable electricity in their manufacturing process, making the most of every drop of water, reusing it time and time again. We transport them in an increasingly cleaner and efficient way.

Giving it all in exchange
for a better future.

CO₂nsconscious Carbon Footprint

We measure and monitor our organizational carbon footprint

We innovate to take big steps that leave no trace on the planet. We reduce and address our Organizational Carbon Footprint, reducing emissions and transforming them into added value through offsetting projects.

We prevent, reduce and offset

Efficiency

We promote the efficient use of natural resources and encourage the use of renewable energy to reduce our carbon footprint.

We recycle and reuse water, thus reducing our water footprint.

Circular Economy

We recover and reuse waste.

CoMA We are the only company in the sector with its own waste recovery plant.

We innovate to encourage the use of waste for new uses.

We are researching a new generation of sustainable composite materials.

We design low impact products

A more sustainable future is what we all want. And we are developing the materials to make it possible.

Dekton® is Carbon neutral from cradle to grave. Sunlit Days is the first Silestone® collection to be carbon neutral.

We analyze the life cycle of our products throughout the entire value chain.

We measure and monitor our organizational carbon footprint

In 2022, and for the fifth year in a row, we calculated our Organizational Carbon Footprint, reporting indirect emissions (scope 3).

621,601.50 tCO₂e

TOTAL OCF 2022

Indirect emissions account for 86% of our Organizational Carbon Footprint.

Scope 1	Scope 2	Scope 3
12.45%	1.37%	86.18%

We take a step further **in the calculation of our Organizational Carbon Footprint of direct and indirect emissions on a half-yearly and annual basis, which allows us to anticipate and reduce our CO₂ emissions.**

Similarly, we continue to work to ensure that the OCF **is the backbone** of decision-making in the areas that affect the environmental component of the company.

We do this through **more efficient and productive processes**, collaborating with our suppliers, through more sustainable mobility, by engaging in **UN recognized projects** that have an impact on people's lives, and by committing to the revitalization and protection of **natural environments**.

Carbon footprint distribution at Cosentino

Footprint reduction as the backbone

-12.8% reduction in the Carbon Footprint rate per unit produced compared to 2018.

Carbon footprint reduction vs. 2018

2022	2023 goals	2025 goals
12.8%	14.1%	17.1%

We voluntarily set an emissions reduction target as part of our commitment to the planet.

-35% Voluntary
2030 emissions
reduction target

Proof of this commitment is our B score in the Carbon Disclosure Project (CDP), a not-for-profit charity that scores companies on their decarbonization strategy and ESG policy through transparent disclosure of the corporate strategy.

As is the signing of the letter of commitment with the Science Based Targets (SBT) initiative, which will allow us to assess, within a maximum of two years, the alignment of our strategy: to limit the increase in global temperature to below 2°C compared to pre-industrial levels, in line with the Paris Agreement.

Silestone® EPD
(Environmental
Product
Declaration)

Dekton® EPD
(Environmental
Product
Declaration)

We prevent, reduce and offset

Our production processes show our deep respect for the efficient use of natural resources, paying special attention to every drop of water, every ray of sunshine and every pound of raw material.

We develop innovative processes driven by the most advanced technology.

- Efficiency
- Circular economy
- Low impact products

→ Industrial Water Treatment Plant

Efficiency

Our sources of electrical energy make us proud

In our manufacturing process, 100% of the electrical energy used in Cantoria (Spain) and Brazil comes from certified renewable sources with a Guarantee of Origin (GoO).

But we want to go further than that. In 2022 we started up our Solar Plant, one of the largest self-consumption photovoltaic plants in Europe. In addition, we are using the roofs of the production plants to increase our self-consumption capacity.

38,000 solar panels.
Over 20 MW peak power.
34,000 MWh per year.

Over an area of more than 40 hectares.

We generate 15% of our current consumption.

This is equivalent to the annual electricity consumption of 42,500 households in Spain.

Self-consumption
Electrical Energy %

2021	2022	2023 goals	2025 goals
0%	2%	24%	27%

Efficiency

We make the most of every drop of water, as if it were the last

Our technological capacity enables us to recycle and recirculate water, over and over again, thus reducing our water footprint.

99% RECYCLED WATER AND ZERO DISCHARGE

Water belongs to everyone. We don't waste a drop. In accordance with our **Zero Discharge policy**, we recover water and reuse it in our production processes or in the irrigation of green areas.

The construction of our Wastewater Reclamation Plant (ERAR) was completed in 2022. The plant will enable us to meet the challenge of water circularity at our industrial facilities in Cantoria throughout 2023. This plant allows us to recover 600,000 m3 of water per year.

We treat and recirculate more than 80,000 m³ of water per day.

This is enough water to **fill 24 Olympic swimming pools every day.**

Or to **supply a city of 400,000 people.**

Water Footprint in the Production of Dekton® + Silestone® (litres/kg)

2021	2022	2023 goals	2025 goals
0.69	0.62	0.62	0.61

Efficiency

Resources are finite. Every pound of raw materials counts

Our production teams are constantly working to use all raw materials in the best possible way. Efficiency is one of our core goals, because the waste that generates the smallest carbon footprint is the waste that is never produced.

Efficiency in the use of Raw Materials (%)

2021	2022	2023 goals	2025 goals
66.6%	67.2%	68.2%	71.0%

Efficiency

E-Smart mobility. An unstoppable transformation.

We develop smart digitalization, sensorisation and electrification tools that have a positive impact on our internal and external emissions and we strive to serve our customers quickly and efficiently, reducing our carbon footprint.

We have implemented the Transporeon® Carbon Visibility software, which will allow us to have real knowledge of the CO₂ emissions associated with the transport routes derived from our business activity. This new tool will help us to plan, optimize and reduce emissions in this important area of Scope 3.

Mobility plan

Green parking lot

With 12 free charging points available for electric cars.

Carpooling

A service that has been improved through digitalization thanks to the Ciclogreen platform.

Bus routes

Two new bus routes from nearby locations in order to reduce emissions associated with individual transport and improve the well-being of our employees.

Electric bikes

10 new bikes for transport within the industrial park, bringing the current fleet to 60.

Circular economy

We firmly believe that today's waste is tomorrow's resource

A more sustainable future is what we all want.
And we are developing the materials to make it possible.

We Recover and Reuse Waste.

COSENTINO^{RE3}

- R3DUCE
- R3CYCLE
- R3USE

We are leading a new circular development model for our industry and society. We reuse more materials, make better use of resources and find better ways to recover waste.

Our products have been developed with recycled or recovered raw materials in their formulation.

More than 3 million m² of slabs produced with recovered or recycled material (1/3 of the total production).

This is equivalent to one countertop in 1 million households.

In 2022, 7.6% of the raw materials used were recycled or recovered. This was 1.11% more than in 2021.

Recovery
Solid Waste (%)

2021	2022	2023 goals
12.38%	15.81%	19.70%

2025 Fire Euroclass A1
in accordance with
EN 13501-1 for Dekton®

29.0%

Circular economy

CoMA is part of our innovative center for circular development.

CoMA We are the only company in the sector with its own waste treatment and recovery plant.

CoMA ENVIRONMENTAL SOLUTIONS

In 2022 we managed **436,878 tons of solid waste, of which 16.44% was recovered.**

Global performance
in Cantoria and Brazil

A space for the development of recovery projects that has also made it possible to reduce the environmental impact of transporting waste.

The launch of our own Waste Management and Recovery Plant was a major milestone in the Circular Economy Strategy in 2018.

Expansion work has begun on our waste treatment and recovery plant to ensure the long-term storage and treatment of the waste generated.

Low impact products

Our products that are made from recycled materials are not only more conscious: they are simply better

We use recovered or recycled raw materials in the manufacturing of our products.

All the efforts made both in the improvement of production processes and in R&D investment aimed at using new materials have enabled us to incorporate a minimum content of 5% of pre-consumer recycled raw materials in all Dekton® production and more than 20% for HybriQ+, which represents 17% of Silestone®'s total production.

7.6%

In 2022, the use of recycled raw materials in the manufacture of Silestone® and Dekton® was 7.6% of total raw material consumption. In 2023 we aim to reach 9.5%, and in 2025 to exceed 18%.

We innovate to create new opportunities for every type of waste and for the future of everyone

Circularity Project: We innovate to find new uses for waste.

We improve our production processes and develop advanced R&D capabilities to ensure our waste can be reused and recycled to produce new products for different applications.

We design processes that allow us to use waste as a **raw material** for our Silestone® and Dekton® products and, in a technically and economically feasible manner, as construction material for roads, infrastructures, floorings and ceramic products.

We are creating a more sustainable future through a new generation of materials

We are researching a new generation of sustainable composite materials.

EOCENE PROJECT

We are leading a key research project to develop a new generation of highly sustainable **thermoset composites** from renewable sources.

It will boost the development of new solutions for applications in the fields of architecture, design, construction and aeronautics.

A project shared with leading companies in their respective fields, including:

The project also involves the participation of **13 research institutions and universities** and is supported and recognised by the **Spanish Ministry of Science and Innovation**, the **Spanish Centre for the Development of Industrial Technology** and the **Technological Corporation of Andalusia**.

Our offsetting has a double impact, as it addresses emissions that are unavoidable

We promote biodiversity.

We convert our emissions into revitalized woods, improved marine ecosystems and **we have created a Green Belt** surrounding our industrial park that protects its natural environment.

In addition, we have carbon credits for two renewable energy production projects: Loma Los Colorados Landfill Gas Project, in Chile, and Oaxaca II and IV Wind Energy Projects, in Mexico, which have a direct impact on sustainable development by supporting the local economy and creating job opportunities, thus generating a double social and environmental impact.

165,360 m²
Reforested areas

+ 6,500 shrubs
and trees

Pioneering project in collaboration with the Spanish environmental association Sustenta, with the direct involvement of our employees, in actions to preserve the Sierra de los Filabres mountain range.

In collaboration with Equilibrio Marino, a Spanish non-profit environmental organization composed of divers, scientists and sea lovers, we aim to protect the Mediterranean.

The big change we want to make starts with each of us

We are an opportunity open to young people. To all those who aspire to develop their careers in a place that puts the human being above all else. A place where your life matters, as does your work-life balance, what you want, what you dream about. A place where your ideas become realities, amazing products and a more liveable world. A safe place. Where your health matters more than anything else. And the ways to take care of yourself are refined and reinvented.

We are that place that makes us feel empowered to change our society for the better. Creating new and better educational opportunities for young people, bringing art and culture to all. Supporting creators, artists, designers and architects to transform and make more sense of everything around us. We are part of those who struggle for a more sustainable society in all areas of their lives: starting with their kitchens.

It is not just a model of efficient management committed to maximum transparency. It goes further

We all have a lot to contribute to Cosentino's Good Governance policy.

It is our collective way of being, of acting ethically and rigorously, of interacting with honesty, of treating others with respect, of demanding the best of ourselves, of becoming better and better: at all levels or spheres of our Group, from our President to those who have just signed their first contract after completing their internship. Because we all make small or big decisions every day that have an impact on our social environment. Every link counts to generate a positive impact from all areas of our company. Our Good Governance principles also include our suppliers and partners. We surround ourselves with people and companies that share our approach to positive impact. We demand ethical exemplarity and good sustainability practices from them.

Our commitment to corporate governance shows ongoing improvement, always seeking the highest degree of transparency, efficacy and rigor

We contribute to the United Nations' Sustainable Development Goals

We continue to do our best for the benefit of all in the face of major global challenges.

It is possible. We are getting there. Together. Together with the international community, we keep moving forward in the development of a fairer and more sustainable organization in all areas. The roadmap of the UN 2030 Agenda guides us in establishing the lines of work. In the fulfilment of our commitments, at Cosentino we actively contribute to the following SDGs:

Primary goals

SDG 3
Good health and Wellbeing

We work for the health and wellbeing of employees throughout the value chain.

SDG 8
Decent Work

We are committed to the continued growth of quality employment.

SDG 9
Industry, Innovation and Infrastructure

We use more sustainable industrial systems and contribute to local communities.

SDG 12
Responsible Consumption and Production

We develop more sustainable products, moving towards circular economy models.

SDG 13
Climate Action

We are committed to the continued growth of quality employment.

Secondary Goals

SDG 4
Quality education

SDG 7
Affordable and Clean Energy

SDG 11
Sustainable Cities and Communities

SDG 17
Partnerships for the goals

SDGs: driven by the UN

Certifications

We move towards excellence in sustainable products through effective management certified by leading organisations.

Cosentino®

- ISO 9001
- ISO 14001
- ISO 20400
- ISO 45001
- ISO 50001
- Leed and Breeam credits for Silestone®, Dekton® and Sensa by Cosentino®
- CSR (verified by KPMG) based on GRI (Global Reporting Initiative)
- ISO/IEC 27001:2013

HybriQ® Verification Certificate

DNV (Det Norske Veritas) verifies that Silestone® with HybriQ/ HybriQ+® technology maintains the same performance as its previous formulation and meets all environmental indicators published.

Silestone® EPD

Designing sustainable products requires knowledge of their environmental footprint throughout their life cycle (Life Cycle Assessment), from raw material sourcing to end-of-life and subsequent management. To this end, the Environmental Product Declaration is key. We have updated the EPD of Silestone®, which is an important demonstration of transparency on the impact of the product. We have a better understanding of the environmental performance of the product in order to improve it.

Silestone®

- Declare Label
- Environmental Product Declaration (EPD).
- EPD (Envirodec)
- VOC emissions: UL Greenguard and Greenguard Gold
- VOC emissions: A+ French Label (Eurofins)
