AIA Continuing Education System
Cosentino Registered Provider Program Summary Handout

Provider: Cosentino
AIA Course Number: ICS06H
Length: 1 Hour
Credits: 1 AIA HSW CE Hour

Course Title: Surface Innovation - Redefining Boundaries of Interior and Exterior Spaces with Ultracompact Surfacing

Description
In this course, we explore a cutting edge surfacing technology, ultracompact surfacing. Gain insight into how this surfacing material possesses the same characteristics of natural stone while providing unmatched color and design flexibility.

Learning Objectives
Upon completion of this course, the design professional will be able to:
1. Discuss the evolution of surfaces and the various types of surfacing material for interior and exterior applications
2. Define ultracompact surfacing and the innovative production process that creates intrinsically unique properties
3. Discuss designing with ultracompact surfaces in terms of color, texture, and format
4. Discuss the advantages of compact surfaces in terms of strength, durability, chemical resistance, absorption, abrasion resistance, and ASTM testing
5. Identify possible interior/exterior application options with ultracompact surfacing material

Method of Delivery
The course is offered to design professionals in a live setting.
